

we aim to achieve the best evolutionary outcomes through scientific researches, field trials and our specialized team

## About Us

Capital International Group is specialized in the field of animal health. we strive for excellence in all Sectors of animal health, including the therapeutics sector, vaccines and feed additive.

we are also active in the poultry production sector, which includes Breeder and Broiler farms

At 2012 Capital International Group began with the United Global for Distribution Company (Sub-distributors) which continues to operate till to day.

- During this period, we have successfully become recognized as one of the top sub-distributors for many International companies and covering all parts of Egypt.
- At 2015  
As a result of this success, we established Capital International Group, which serves as the exclusive Agent for a number of international and global companies.
- At 2017 we established Breeder farms, and developed this sector to become Breeder and Broiler farms at 2018.
- In the Egyptian market We have successfully seeded and marketed the products of the companies which we are an exclusive Distributors for it.  
Adding on We have the ability to seed and market any products in the veterinary sector given our resources for success.

**Capital breeder farms**

**We started at 2016 to raise**

**Breeder and broiler farms located in several locations  
in egypt with all of them we are using closed system  
and we are expanding to double capacity**

# Our Products

## Antibiotics

### MULINGANIC

#### Composition

Each 1 gm contains:  
Valnemulin Hydrochloride 532.5 mg (Eq. to  
Valnemulin base 500 mg)

#### Indication

Mulinganic is used for treatment of :

1. Chronic respiratory disease (CRD)
2. Infectious synovities
3. Infectious sinusitis
4. Streptococcal and Staphylococcal arthritis.
5. Fowl cholera
6. Infectious coryza
7. Chylamydiosis.

#### Dosage

10 mg /kgbw  
IM Injection & DW

# Our Products

## Antibiotics

### BIOVALINAT

#### Composition

Each 1 gm contains:  
Valnemulin Hydrochloride 532.5 mg (Eq. to  
Valnemulin base 500 mg)

#### Indication

Biovalinate is used for treatment of :

1. Chronic respiratory disease (CRD)
2. Infectious synovitis
3. Infectious sinusitis
4. Streptococcal and Staphylococcal arthritis.
5. Fowl cholera
6. Infectious coryza
7. Chylamydiosis.

#### Dosage

10 mg  
/kgbw  
Feed  
additive

# Our Products

## Antibiotics

### SOLAZE

#### Composition

Each 100 gm contain: Amoxicillin Trihydrate  
45.9 gm (Eq to amoxicillin base 40 gm).

#### Indication

The gram-positive spectrum of activity includes alpha- and beta-hemolytic streptococci, some Staphylococci species, Clostridia species, E. coli, many strains of Salmonella, and Pasteurella multocida.

#### Dosage

500 mg of product per liter of  
drinking water daily for 3-5  
consecutive days

# Our Products

## Antibiotics

### VIPROGROTH

#### Composition

Each 1 gm contains: Ampicillin Trihydrate 577 mg (Eq. to Ampicillin 500 mg)

#### Indication

It is effective in the treatment of enteritis and airway infections caused by *E. coli* & *Ornithobacterium rhinotracheal*, *Salmonella* and *Clostridium spp.*

#### Dosage

400 mg/litter of drinking water for 7 days

# Our Products

## Analgesic Anti-inflammatory

### PARACET

#### Composition

Each 1 ml contains 400 mg of paracetamol.

#### Indication

- 1 - Paracet analgesic drug against infectious and inflammatory diseases associated with various pain syndromes and hyperthermia in poultry.
- 2 - Paracet helps to clear air passage form mucus content and thus, improves respiration.
- 3 - Paracet increases feed utilization, feed conversion rate, growth rate and weight gain in chickens.
- 4 - Paracet for heat stress cases caused by extreme high temperature.

#### Dosage

1 ml/ 10 kg  
bwt IM  
injection

1 ml / 4 liter  
DW for 5  
days.

# Our Products

## Anti - Coccidia

### ZOMAGEN

#### Composition

Each 1 ml contains:

- Amprolium Hcl ..... 240 mg  
(eq.to amprolium base ..... 212.2 mg)
- Ethopabate 15 mg.

#### Indication

Treatment of coccidiosis in broiler chickens caused by *E. tenella*, *E. maxima*, *E. aceryulina*, *E. brunetti* and *E. necatrix*.

#### Dosage

0.6 ml /Liter  
DW for 5-7 days.

# Our Products

## Anti - Coccidia

### DICLAZU

#### Composition

Diclazuril ..... 1%  
vitamin K3 ..... 10%  
Natural herbal additions

#### Indication

A broad spectrum anti-coccidial agent for treatment and prevention of coccidiosis in poultry.

#### Dosage

0.5 ml /Liter  
DW for 3-5 days.

# Our Products

## Immunostimulant

### LECTA ES

#### Composition

Lectin .....	40 gm
Oregano Oil .....	100 gm
Echinacea .....	50 gm
Vitamin E .....	200 gm
Selenium .....	0.1 gm
Zinc .....	5 gm
Iron .....	5.3 gm

#### Indication

- 1 - Antiviral agent as AI, ND, IB and ILT.
- 2 - Antimicrobial agent
- 3 - Immunostimulant
- 4 - Growth promoter for improvement of feed intake, feed conversion ratio (FCR), growth and weight gain.
- 5 - Enhancing fertility and production

#### Dosage

0.5 - 1 ml /Liter  
DW for 3-5 days.

# Our Products

## Immunostimulant

### MIAROM L

#### Composition

Eucalyptus oil 90 gm (include 55 gm Cineole)

Anise oil 50 gm (include 20 gm Anethole)

Thyme oil 40 gm (include 8 gm Thymol)

Peppermint oil 20 gm (include 15 gm Menthol)

#### Indication

- 1 - Antiviral agent as AI, ND, IB and ILT either orally or by spray application.
- 2 - Air disinfectant for minimizing bacterial & viral load
- 3 - Immunostimulant
- 4 - In broiler breeder, improves fertility, hatching of total eggs and increase immunity of hatched chicks against ND & IB.
- 5 - Appetite enhancer & Growth promoter.
- 6 - Avoid heat stress and its negative impacts.

#### Dosage

**Protection**  
1 MI/ 7L DW  
(12 hrs) Twice weekly.

**Spray** 5 ML / 1  
L water Twice weekly

**Treatment**  
1 MI/ 4L DW For 3-5 days.

**Spray** 4 ML / 1 L water 3-5 days

# Our Products

## Liver & Kidney Support

### VITAL BIO POWER

#### Composition

MOS .....	60 gm
BG .....	60 gm
FOS .....	80 gm
Vitamin E .....	28 gm
Vitamin C .....	10 gm
Methionine & lysine .....	50 gm
Silymarin (80 %) .....	20 gm
L-carnitine (90%) .....	50 gm
Betaine .....	50 gm

#### Indication

- 1 - Biological anti-mycotoxin
- 2 - liver tonic
- 3 - Treatment of fatty liver syndrome and uterine prolapse in layers.

#### Dosage

0.5 - 1 ml /Liter DW for  
3-5 days.

# Our Products

## Liver & Kidney Support

### NO DRY

#### Composition

- Highly conc. electrolytes mixture
- Betaine 50 gm
- Sorbitol 200 gm

#### Indication

- 1 - Control of dehydration after long time of diarrhea and enteritis
- 2 - Control of dehydration appear in one day old chick
- 3 - Control of dehydration after heat stress.

#### Dosage

1 gm /Liter  
DW for 3-5 days.

# Our Products

## Liver & Kidney Support

### DURIT CARE

#### Composition

Ammonium chloride.....	267 gm
Mg Sulfate .....	9.5 gm
Na sulfate.....	150 gm
Potassium chloride .....	45 gm
Vitamin C .....	150 gm
Betaine.....	130 gm
Menthol .....	5 gm
Na bicarbonate .....	20 gm

#### Indication

- 1 - Renal flasher recommended in mycotoxins contaminated feed and after antibiotics use, renal IB, IBDV, after antibiotics & routinely in layers to prevent gout.
- 2 - Anti-heat stress.
- 3 - Improves general health condition and growth performance

#### Dosage

0.5 - 1 gm /Liter DW for  
3-5 days.

# Our Products

## Growth Promoters

### NUCLEO BEAT

#### Composition

- Multi vitamin mixture (A , B complex, C, D & E)
- Mineral mixture & Electrolyte.
- Amino acid mixture
- Salicylic acid..... 50 gm
- Menthol..... 35 gm
- Betaine .....15 gm
- Nucleotide ..... 5 gm

#### Indication

Acts as poultry tonic, antioxidant and anti-stress for better poultry performance.

#### Dosage

0.5 - 1 ml /Liter  
DW for 3-5 days

# Our Products

## Growth Promoters

### CAL - PHOS D3

#### Composition

- Vitamin D3.
- Highly conc. minerals mixture

#### Indication

- 1 -Prevention and treatment of deficiency of essential elements and minerals in birds.
- 2 - For better skeleton performance
- 3 - Improves egg shell quality

#### Dosage

1 ml /Liter  
DW for 3-5 days

# Our Products

## Anti - Colistridia

### COLIBAN GASTRO

#### Composition

Carvacrol .....	39 gm
Clove oil .....	32 gm
Cinnamoldhyde .....	40 gm
Garlic oil .....	50 gm
Betaine .....	90 gm
Vitamin A .....	40,000,000 IU
Vitamin B .....	50 gm
Zine sulphate .....	70 gm
Monobutyryne .....	150 gm

#### Indication

Potent liquid mixture used as alternative to antibiotics in treatment of Clostridia species infection in poultry (Necrotic enteritis & ulcerative enteritis).

Its components act synergistically on clostridia and their toxins with anti-flatulent effect and appetizer

#### Dosage

0.5 ml / Liter  
DW for 3-5 days.

# Our Products

## Mucolytics

### BROMAC

#### Composition

Each 1 ml contains:

Bromhexine hydrochloride 10 mg.

#### Indication

An effective mucolytic in treatment of several respiratory tract infections as IB, ILT, ND, CRD, Infectious coryza in poultry and infectious sinusitis and coryza in turkey

#### Dosage

1 ml/ 10 kg  
bwt IM injection

0.5 ml / liter  
DW for 3-5 days

# OUR PIPELINE

N	Name approval	Active ingredients
1	<b>Jensaloverel</b>	Each vial powder (capacity 50 ml) contains: Cefotaxime sodium 5.24 gm ( Eq.to Cefotaxime base 5 gm ) & Vial (diluent) contains 50 ml water for injection After reconstitution: Each 1 ml contains: Cefotaxime base 100 mg Sterile Powder and solvent for solution for injection
2	<b>Zemapelquin</b>	Each 100 gm contains: Sulfaquinoxaline sodium ..... 20 gm AmproliumHCl ..... 20 gm DiaveridineHC ..... 2.1 gml Vit. K ..... 23 gm Powder for oral solution
3	<b>Arsemvlotan</b>	Each 1 ml contains: toltrazuril ..... 50 mg Powder for Oral suspension
4	<b>Devifloxylate</b>	Each 1 ml contains: Danofloxacin mesylate ..... 31.73 mg danofloxacin ..... 25.00 mg Solution for injection
5	<b>Impomycisulf</b>	Each 100 gm contains : Streptomycin Sulfate ..... 100 gm ( Eq. to Streptomycin Base 80 gm ) Powder For Oral Solution
6	<b>Dempomeficol</b>	Each 1ml contains: Thiamphenicol ..... 250 mg Oral Solution for use in drinking water.
7	<b>Mevlodexapel</b>	Each g contains: Doxycycline (as hyclate) ..... 400 mg Bromhexine (as HCL) ..... 40mg Powder For Oral Solution

## OUR PIPELINE

N	Name Approval	Active Ingredients
8	Mefkoprofket	Each ml contains: Tulathromycin ..... 100 mg Ketoprofen ..... 120 mg Solution for injection
9	Mifkotilmicosin	One ml contains: Tilmicosin (as tilmicosin phosphate): ..... 250 mg Solution for use in drinking water or milk replacer
10	Spiramifkoveta	Each 100 g contains: Spiramycin Adipate ..... 207,000,000 IU Equivalent to(Spiramycin base 59.449 g of 3.482 IU/mg) Powder for oral solution
11	Dimetimefk	Each 1 kg contains: Dimetridazole ..... 100 g Sodium sulfdimethoxine ..... 100 g Vitamin K3 (MSB) ..... 5 g Powder for oral solution
12	Mifkomulivalne	Each g contains: Valnemulin hydrochloride ..... 106.5 mg (Equivalent to Valnemulin base ..... 100 mg) Powder premix for medicated feeding stuff

## OUR PIPELINE

N	Approved Name	Active ingredients	Dosage Form
1	Jarnometavet	Each 1 ml contains: Amikacin (as sulfate) 250 mg	Sterile Aqueous Solution
2	Pandocichlor	Each 1 ml contain: Difloxacin (as difloxacin Hcl) 100 mg	Oral Solution
3	Senravaloped	Each g contains: Tylvalosin (as tartrate) 850 mg	Water Soluble Powder
4	Lumeverafen	Each 1 ml contains: Florfenicol 200 mg	Solution for use in drinking water
5	Slemarbolim	Each 1 ml contains: Marbofloxacin 100 mg	Solution for injection
6	Methomotival	Each 100 gm contains: Bacitracin (as Bacitracin methylene disalicylate) 44.06 gm E	Powder for oral solution
7	Phenoxymotivan	Each 1 gm contains: Phenoxymethylpenicillin potassium 325 mg (Eq. to phenoxymethylpenicillin 293 mg)	Powder for oral solution
8	Tyldoxivarol	Each 100 gm contain: Tylosin (as tartrate) 50 gm + Doxycycline (as hydrochloride) 25 gm.	Powder for oral solution
9	Motipyremol	Each 1 ml contain: Paracetamol 400 mg.	Solution for use in drinking water
10	Motisolvitral	Each 1 ml contains: Bromhexine (hydrochloride) 20 mg	Solution for use in drinking water
